

Safe for your crop, more assurance for you!

# SERCOM CO-meter

With SERCOM you have the best to protect your crop against the dangerous concentrations of carbon monoxide! Reliable protection is essential. Our CO meter is specifically focused on the greenhouse and measures very accurately. SERCOM is already more than 30 years leading in this area.

Carbon monoxide (CO) and nitric oxide (NO) are highly damaging to your crop. Sercom supplies both precise CO-meters and precise NO-meters.

On the CO meter it is standard that you can connect an extra NO-sensor or an extra CO sensor. The measurements can also be coupled to the climate computer.

CO- and NO-measurement

Easy operation

Illuminated graphic display

Alarm registration memory

Service indication

Memory saved when power goes down

Long lifetime and sustainable sensor
