

SercoNet

Your process computer always within reach

Processes that are critical for your business, like climate control or irrigation, need to be monitored continuously. With SercoNet you can log in remotely to all your computers from your cellphone. You can check the settings and adjust them, if necessary. It is also possible to receive a specific alarm via a separate sms module. SercoNet is thus an indispensable aid for every grower.

SercoNet works over the internet and can be accessed with any type of smartphone with an active internet connection. Using your name and password, you log in quickly and easily to all your process computers. Wherever you are, you can always download a complete overview of all blocks. Adjustments can be made remotely in the settings, if necessary. SercoNet increases the operational safety as well as bringing you peace of mind and greater freedom.

In brief:

- Remote overview
- All blocks visible
- Suitable for every type of smartphone
- Simple and fast
- Gives you more freedom
- Greater security
- Indispensable
