

Dear SERCOM relation,

Despite the particularly difficult time, which also has a very drastic effect on our sectors, we would like to keep you informed about our most recent developments.

The following subjects are covered in this edition of SERCOMmunication:

- » [Measures related to the corona virus](#)
- » [New: Affordable and accurate control of irrigation and climate](#)
- » [Worldwide first: Wireless irrigation system](#)
- » [The New Storage](#)
- » [2nd place Innovation Prize Mechanisation Exhibition](#)

Measures related to the corona virus

The current circumstances of the corona virus affect our day-to-day activities very profoundly. Our industry is also going through very difficult times at the moment and many of us are noticing serious consequences.

We hope, with you, that we will all get through these hard times and we will, after this has ended, be well, both in business and in particular in terms of health. The management of SERCOM has also decided to take some measures.

NEW: Affordable and accurate control of irrigation and climate

In addition to the advanced and very extensive climate computers that SERCOM has been developing and supplying since 1984, we have recently developed a completely new computer system. This system focuses on the most fundamental controls within the greenhouse or outdoor cultivation (irrigation).

The so-called SC400 can be operated via a free app and contains almost every function required for optimal control of each crop and focuses on one department per SC400 computer.

Worldwide first: Wireless irrigation system!

It is not the first country you will think of when it comes to high-tech greenhouse horticultural innovations. However, Honduras recently had a worldwide first.

At grower Exveco we have installed the very first fully wireless irrigation system. We have developed this product based on radio technology. This is an existing and long-proven technology that ensures that there is no delay between measurement and action.

The New Storage

Recently, after years of innovation, SERCOM introduced an entirely new software package called "The New Storage" (V22).

It concerns Version 22 in combination with SercoView and it is currently available for integration in SercoVision 6. Meanwhile, the software is operational at a group of leading flower bulb growers.
