

Dear Sercom relation,

The past months have been characterised as a period that we, in this form, have never experienced before. This will no doubt be true for many of you. With this edition we would like to inform you about what has happened within our company in past couple of months.

The following subjects are covered in this edition of SERCOMmunication:

- » Process computer for irrigation and climate
- » CO detection
- » SC400 - After its introduction
- » Montera Techniek new Sercom dealer
- » Several computer expansions
- » Control via Modbus over IP

Process computer for irrigation and climate

Plant nursery P. Mostert from 's-Gravensande recently placed the definitive order for an extensive process computer.

This will be used to control both the irrigation and the climate in the greenhouses.

CO detection

In addition to process computers, we have also built up a good reputation with our CO detectors. Developed and manufactured entirely in-house, this product has been shipped worldwide for decades.

More information on our CO detection can be found on our website.

SC400 - After its introduction

The introduction of the new SC400 climate computer for managing climate or irrigation received a lot of international interest.

This has already resulted in concrete orders, some of which have already been delivered.
