

***** Rectification *****

In our previous newsletter we accidentally mentioned the wrong Mostert. The right one is nursery Mostert from Nieuwerkerk aan den IJssel.

Dear Sercom relation,

We have reached the last month of a remarkable year. Perhaps a year with personal setbacks and business challenges and a year in which we were asked to do the utmost. We would like to conclude this year with the 5th edition of SERCOMmunication.

The following subjects are covered:

- » Software opportunities SercoVision options
- » Mechanisation Exhibition 2021
- » First major order with Montera Techniek
- » Touchscreen option SercoVision 5
- » SC400 version for tree nurseries
- » Zimflora has switched completely to wireless

Software opportunities SercoVision options

Over the past years, many interesting and useful options have been developed within SercoVision to simplify operation and to get more out of the process computer.

The company GHBD Holland has taken on the task, together with Sercom, to make a selection of Sercom customers for whom these software options could be of importance.

Mechanisation Exhibition 2021

Usually we announce that we will participate in the Mechanisation Exhibition in Vijfhuizen, The Netherlands.

Unfortunately it has been decided by the organisation that this fair will not take place in 2021, due to COVID-19.

**montera
techniek**

First major order with Montera

The recently announced collaboration with Montera has almost immediately led to an important and very interesting order in Dutch horticulture.

We are currently working hard on this and we expect to be able to provide more detailed information about this project soon.

Touchscreen option SercoVision 5

Many of you will be familiar with our SercoVision control software. Within this program we are constantly trying to look for improvements and additions of individual software options. One of these options is operation by means of a touchscreen on, for example, a laptop or tablet.

This function can also be combined with the option Infographics.

SC400 for tree nurseries

Earlier this year, we launched the [SC400 process computer](#) for controlling and monitoring one department within a greenhouse or a fertilizer dosing system. This has resulted in great interest in this system.

In addition, we were asked from the tree nurseries sector whether a version could be developed for controlling taps and pumps, without the addition of pH and EC.

Zimflora completely switched to wireless

In the previous SERCOM communication we informed you that the company Zimflora in Zimbabwe has chosen Sercom for a significant expansion of their production.

This month we could finally travel to Zimbabwe to expand the existing Sercom computers with the wireless field station variant, the [Wireless Xtender](#).

Happy Holidays

To conclude the 5th edition of SERCOMmunication, we would like to wish you happy holidays, a happy and successful, but above all a healthy 2021!

If you have any questions about an item in our newsletter, do not hesitate to contact us via sales@sercom.nl.

Kind regards,
The Passion for control team
