- » Official opening Bosman Van Zaal Germany

Dear reader,

It's time for a new edition of SERCOMmunication. This includes some information about a number of delivered projects and a new product.

#### **Newly developed irrigation computer**

Bosman van Zaal Belgium and SERCOM have commissioned the newly developed watering process computer at a major producer of Kalanchoe and other seasonal plants.

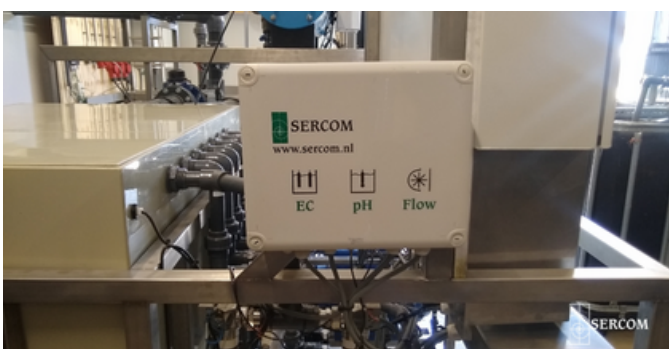

[» Continue reading](#)

#### **Universal power module**

This module makes it possible to operate wireless field stations as a stand-alone unit, powered by solar panels and batteries. This power supply is universal and can therefore not only be used in combination with Sercom equipment.

#### **Unique project in soft fruit sector**

On June 15, SERCOM took part in the National Small and Stone Fruit Day in Buren (Gelderland). This time the edition of this open day was held at Berry Brothers. At the location in Zoelmond, SERCOM supplied an advanced irrigation system, which uses wireless connections.

### Wireless communication storage cells

Within the horticultural sector, SERCOM has already supplied several systems in which the central process computer communicates wirelessly. For the first time there are now also two companies active in the agriculture that use this wireless system.

### SC400 can be composed online

On our website, the SC400 now has its own page in which more information can be found about the possibilities of this system.

### Official opening Bosman Van Zaal Germany

The new building in Geldern will officially be opened on Friday August 26. This will be celebrated with an open dag and a barbecue for all Bosman Van Zaal relations.
