- » Participation in trade fairs

Dear reader,

It is time for a new edition of SERCOMmunication. This includes attention for the winner of the Mechanisation Exhibition campaign and the launch of the wireless RS485 connection set.

#### Winner of Mechanisation Exhibition campaign announced!

The Mechanization Exhibition was held from January 14 to 16. During the fair, we conducted a special trade fair promotion at our stand for visitors. The winning company is [Unex Inc.](#) from Voorhout (NL).

### Points of attention for Windows 11 users

We frequently receive feedback from end users who have recently upgraded to Windows 11 on their PC, resulting in SercoVision ceasing to function. Typically, this issue can be resolved by updating the SercoVision operating software to either version 5 or 6.

### SERCOM launches wireless RS485 connection set

The first Wireless Xtender system was installed in horticulture as early as 2018. This system involved establishing a connection between the process computer and several field stations, located several kilometres from the computer.
