» Meet Ignacio: Manager Latin America

Dear reader,

It is time for a new edition of SKOV-SERCOMmunication. As you've probably heard, SERCOM Regeltechniek B.V. was acquired by the Danish company SKOV A/S in April this year. SKOV primarily focuses on poultry and pigs, but is also keen to enter the (greenhouse) horticulture market. A special newspaper has been published to mark the occasion. In this newsletter, we'd like to highlight some of the topics covered in that newspaper.

SERCOM Regeltechniek B.V. becomes SKOV-SERCOM B.V.
A Dutch company based in Lisse, with over 40 years of experience in the development of electronics and computer systems for process automation in the horticultural sector and intensive crop storage, is entering a new phase of strategic growth.

Let the ex-owners talk
Our new Commercial Director had the pleasure of asking a few questions to the former owners of SERCOM Regeltechniek B.V.
» Continue reading

Wireless connections
In 2018, SERCOM developed a radio-wave-based system that can control irrigation units within a 5-kilometre radius. This method has also been used for several years in open-field cultivation, particularly in fruit growing and tree nurseries.

Tunnel ventilation
In hot regions of the world, it is essential to lower the temperature in greenhouses. With SKOV-SERCOM tunnel ventilation, you can ensure the correct climate inside the greenhouse, even during high external temperatures.
